

Automated Trading Platform

May 2023

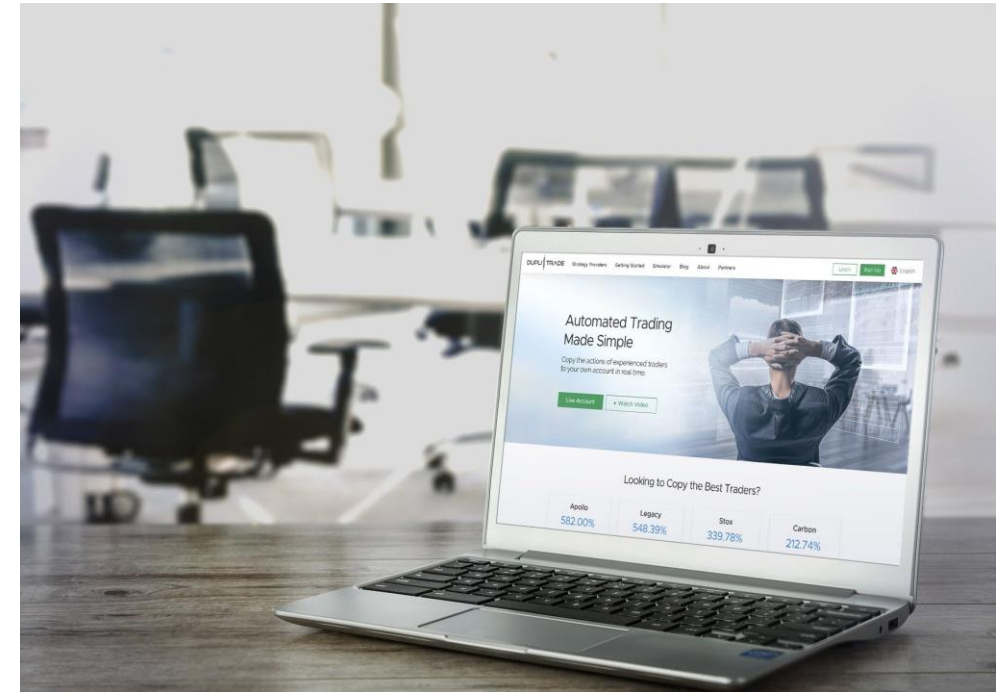

Contents & Agenda

- What is DupliTrade
- Who we are
- Portfolio Creation and account monitoring
- User Journey

What is DupliTrade

- ✓ DupliTrade is a platform that simplifies the automated trading experience for everyone
- ✓ DupliTrade enables clients to easily automate their trading in any MT4/5 account, based on signals from experienced traders, each with his own strategy and proven track record
- ✓ All the trading strategies on the platform are traded on real accounts, with real money, by traders with years of proven trading results.
- ✓ The trades are instantly copied directly to the client's MT4/5 accounts without any further action required, while at the same time the client keeps full control of his trading account

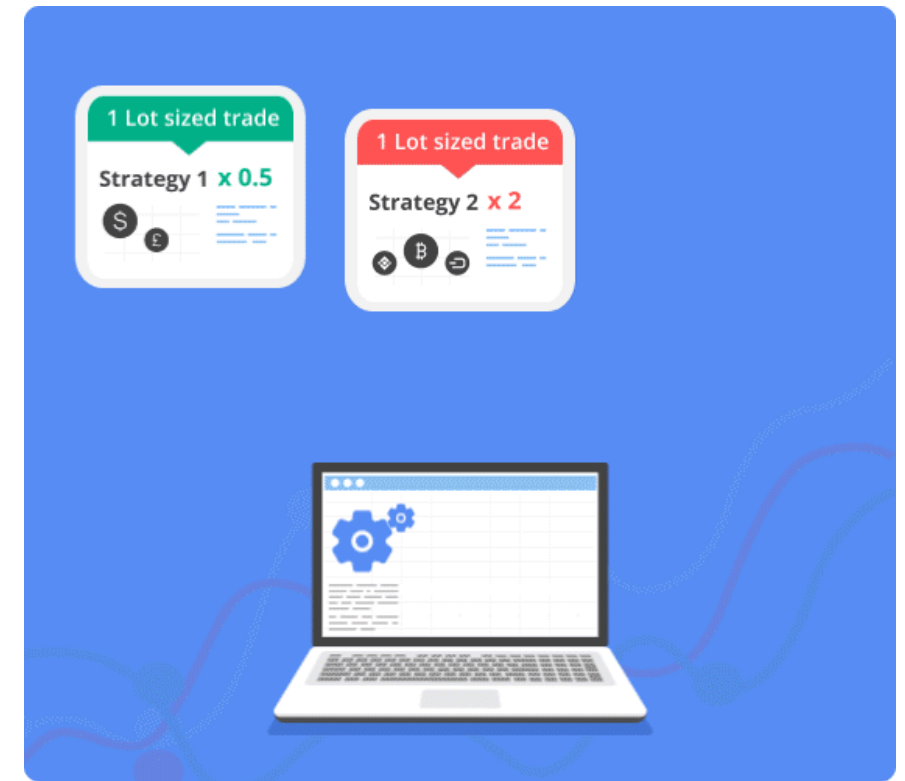

Who we are

- ✓ DupliTrade was established in 2017 and has since then grew rapidly providing automated trading services
- ✓ We are fully regulated and licensed by CySec to provide portfolio management services - <https://www.cysec.gov.cy/en-GB/entities/investment-firms/cypriot/79651/>
- ✓ We constantly source, audit, and test dozens of trading strategies making sure only the very best are accepted to the platform.
- ✓ All candidate strategy providers undergo a lengthy and transparent auditing process before being added to our platform. Throughout the many years of due diligence cycles, we have managed to refine the methodologies that we practice
- ✓ We provide extensive customer support 24/5. Although it's an automated trading platform, we strive to assist our clients and partners in any way possible

Portfolio Creation and account monitoring

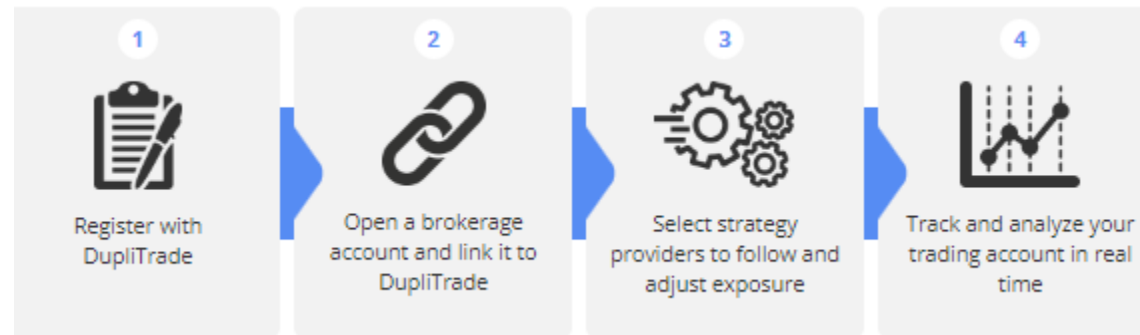

- ✓ Clients may select one or more of the displayed strategy providers
- ✓ Each client also selects his desired exposure level and funds distribution per strategy (copy ratio)
- ✓ This is an advantage for clients as they can adjust the portfolio as per their own equity/balance risk preference and investment targets
- ✓ Once a strategy is selected the execution is fully automated at their brokerage account in real time
- ✓ Clients can also intervene manually anytime and take control over open trades
- ✓ Live trading data as well as charts and statistics are fully available at the DupliTrade client area

User Journey for DupliTrade's retail broker clientele

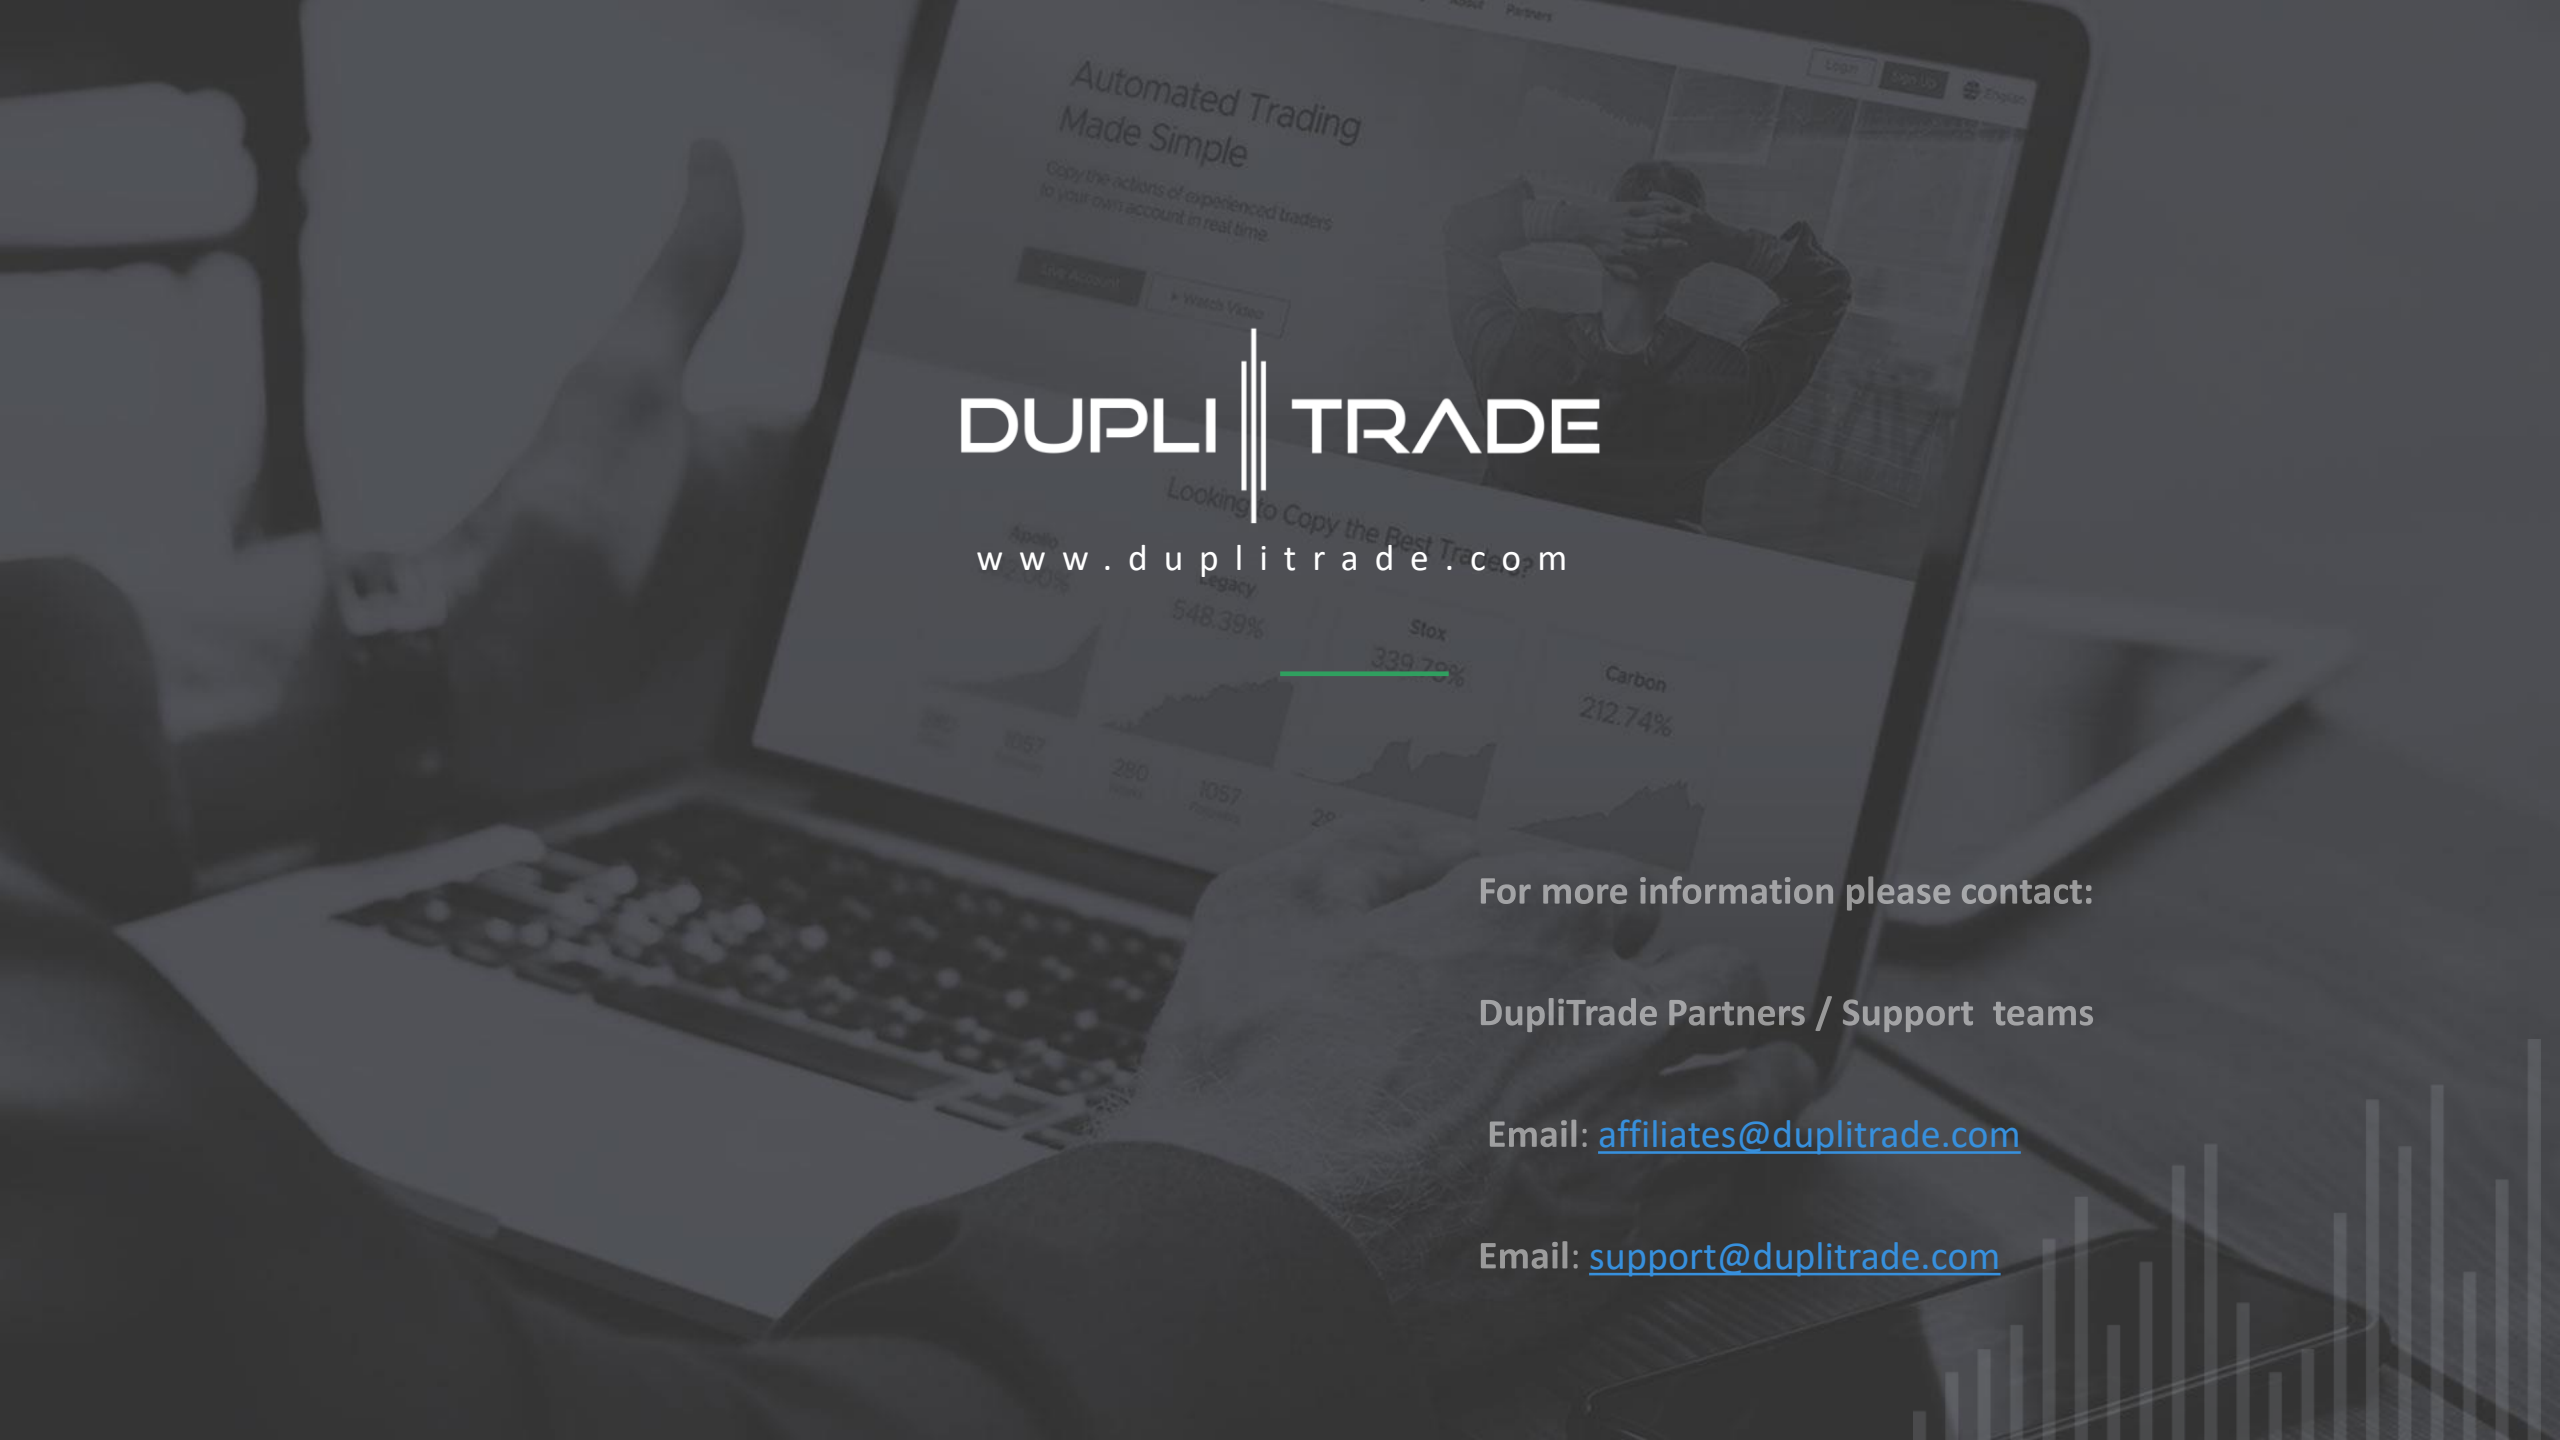

- ✓ Every DupliTrade client is a dual client with a parallel user entity with your brokerage brand
- ✓ Clients can signup at your website and then proceed to DupliTrade, partners are provided with unique tracking links enabling us and our partners to monitor referral activity
- ✓ Clients can first trial DupliTrade on Demo mode and determine which of the offered strategies suit them best for their considered deposit and risk appetite
- ✓ The demo is active in our client area and does not require a broker mt4/5 demo account to be connected

Special setups for Money Managers / IB's

- ✓ Customized setups of the platform allow your partners to tailor the presented view of the DupliTrade platform to their own needs and enjoy a regulated product (for EU clients).
- ✓ Same onboarding flow except it starts with the “tracked” signup URL to DupliTrade.
- ✓ Enables partners to utilize DT technology as an alternative to MaM with a standalone copier account not part of a pool of clients
- ✓ Provides a significant advantage for large capital clients who usually prefer to be on a standalone account and not part of a “Pool/Pamm/MaM” account that distributes trades by equity/balance.
- ✓ Reduced operational load for the partner as the DupliTrade team supports the efforts and allows the partner to focus on sales and trading while we assist with coordinating bureaucracy with the broker partner

Automated Trading
Made Simple
